The Echosec Platform

Real-Time Social Media And Discussion Data For Security And Intelligence Teams

Echosec™
A FLASHPOINT COMPANY

What is the Echosec Platform?

The Echosec Platform is a web-based open-source intelligence tool used by security and intelligence teams worldwide. The Platform delivers real-time data from mainstream social media, fringe networks, and discussion forums to improve situational awareness, understand evolving global situations, and stay ahead of threats.

Echosec prioritizes speed to information, usability, and broad data coverage. Our customers rely on the Platform to deliver real-time results in an intuitive workflow from the widest range of sources possible.
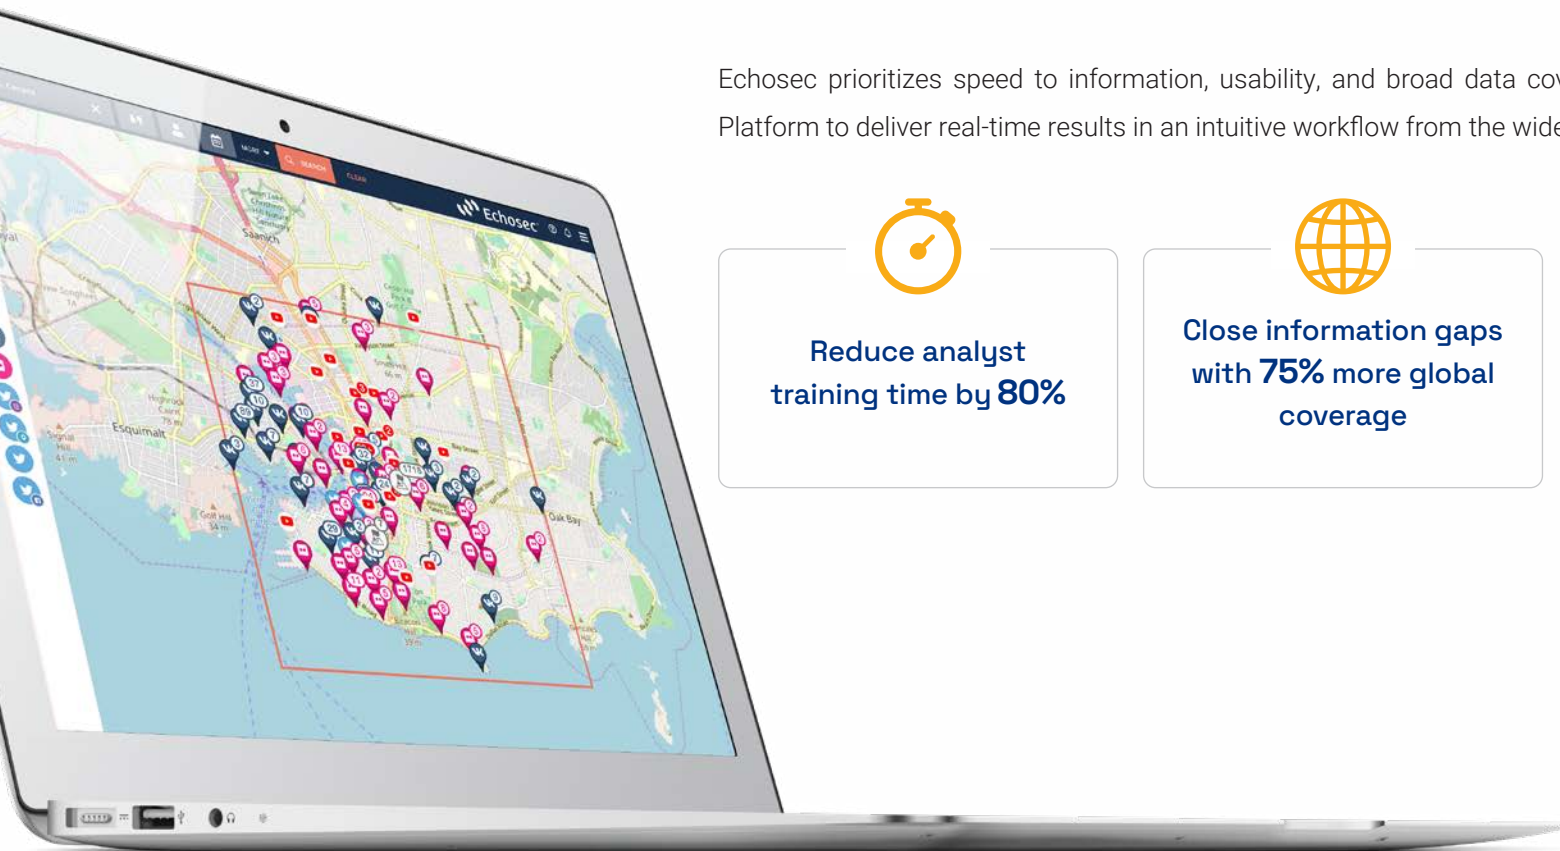

Reduce analyst training time by **80%**

Close information gaps with **75%** more global coverage

Accelerate speed-to-insight by **288%**

What Problems Do We Solve?

Counterterrorism

- Access mainstream social networks and fringe discussion forums
- Monitor propaganda and recruiting tactics in hidden communities
- Identify key influencers and narratives

Dis- and Misinformation

- Monitor fringe networks to identify trending topics and authors
- Analyze emerging narratives and public sentiment

Crisis and Event Monitoring

- Create geofences for real-time, location-based insights
- Get location and keyword alerts delivered straight to your inbox
- Use advanced filters to monitor for violent events, natural disasters, and crisis situations

Executive, Brand, and Force Protection

- Monitor brand and executive mentions to identify potential threats
- Detect leaked information across a variety of networks
- Identify and mitigate global travel-related risks
- Monitor troop locations and regional movement

Geopolitical Risk Assessment

- Monitor social data emerging from critical regions
- Get local insight from regional sources across Asia Pacific countries, the Middle East/Africa, North America, and Europe

Data Sources

Echosec provides streamlined access to billions of new data points every day. We focus on crawling international data sources that are highly relevant to security and intelligence use cases.
