# Flashpoint Ignite for National Security

Comprehensive data and finished intelligence for mission-driven teams

Gather insight, monitor illicit chatter, and inform critical decisions with Flashpoint Ignite. Ignite draws intelligence from across the deep, dark, and surface web, to provide unmatched visibility into the online threat landscape. Understand adversaries, TTPs, and potential threats with a combination of raw data collection, analytics, and human-powered intelligence.

Ignite Benefits

- ✓ **Access** the deepest layers of publicly and commercially available data in a single platform
- ✓ **Augment** threat assessments with an extensive library of finished intelligence reports
- ✓ **Generate** threat actor profiles in seconds
- ✓ **Streamline** investigations and accelerate intelligence cycles with intuitive analytical tools
- ✓ **Understand** the evolving threat landscape with near-real-time data collection

Key Features

Lightning Fast Search
Search across the vast landscape of raw collections, including text, images, videos, and finished intelligence, to find the information you need to connect the dots between events.

Finished Intelligence Reports
Finished intelligence reports give timely, actionable information about the latest cyber events. The news-style reports provide details on geopolitical regions, major cybercriminal techniques, ongoing incidents, and threat actors and groups to provide a full understanding of what's changing in today's security landscape.

Request a Source
Contribute to our expanding data collection pipeline by requesting a data source of interest. New data sources are integrated into Ignite on a daily basis.

Notifications
Receive instant notifications about emerging threats and suspicious activities, enabling rapid response. Customize notifications based on your searches using keywords, filters, collection scope, suppression of duplicates, and specific user roles.

Centralized Investigations
Centralize and streamline security investigations with a dedicated workspace and real-time collaboration tools. Gain visibility into investigation progress and track your team's current status, completed tasks, pending items, and any roadblocks encountered.

Threat Actor Profiles
Develop an understanding of a threat actor by extracting key information from our data and generating a high-level profile in seconds. Dramatically reduce the time and manual labor needed to investigate individuals, and make connections that may not be possible otherwise.

Vulnerabilities
Visibility into vulnerabilities with CVEs and basic metadata about each vulnerability.

Ignite AI
Use natural language search to ask questions and receive instant summaries extracted from finished intelligence reporting. Ignite AI allows you to quickly access and understand complex information without having to sift through lengthy reports or conduct manual searches.

Optical Character Recognition (OCR)
Extract text from images posted within illicit online communities and marketplaces that would otherwise be missed through text searches alone.

Add-ons

Request for Information
Collaborate with our expert analysts to help field questions and conduct research inside closed illicit communities with our Request for Information (RFI) portal. Request, read, share files and track RFI hours directly inside the platform.

Vulnerability Intelligence
Access vulnerability analysis, real-time alerting, and threat-based risk scores to help you remediate risk faster.

Compromised Credentials Monitoring
Monitor exposure of compromised credentials for your enterprise domains and email addresses.

About Flashpoint

Flashpoint is the leader in threat data and intelligence. We empower mission-critical businesses and governments worldwide to decisively confront complex security challenges, reduce risk, and improve operational resilience amid fast-evolving threats. Through the Flashpoint Ignite platform, we deliver unparalleled depth, breadth and speed of data from highly relevant sources, enriched by human insights. Our solutions span cyber threat intelligence, vulnerability intelligence, geopolitical risk, physical security, fraud and brand protection. The result: our customers safeguard critical assets, avoid financial loss, and protect lives.
