

Threat Actor Engagement and Procurement

If your organization has been breached and your digital assets are in the hands of threat actors, engaging with those actors to get your data back can put you and your organization at risk, and may be prohibited entirely as a legal precaution. With the Threat Actor Engagement and Procurement service, Flashpoint will anonymously and securely engage with threat actors on your behalf. This may include coordinating a threat actor engagement to identify the possible source of the material or data, validate the information, purchase or otherwise obtain the specific data, and arrange for any other communications with the actors.

Key Benefits

- ✓ Eliminate the need to engage with threat actors directly
- ✓ Acquire any additional information the threat actors may have on your organization
- ✓ Stay up-to-date during the engagement process through regular communication with Flashpoint
- ✓ Leverage the experience of professionals with 55+ years of combined security and intelligence experience in the government and private sectors

With explicit customer direction, Flashpoint will:

- ✓ Attempt to engage with the threat actor to validate the authenticity of the information and arrange for other communications on your behalf
- ✓ Purchase or attempt to purchase data, intellectual property, or other associated information in support of the engagement
- ✓ Provide any data or other information gathered as a result of the engagement with the threat actor(s)
- ✓ Coordinate closely with you and provide regular updates throughout the course of the engagement

About Flashpoint

Flashpoint is the leader in threat data and intelligence. We empower mission-critical businesses and governments worldwide to decisively confront complex security challenges, reduce risk, and improve operational resilience amid fast-evolving threats. Through the Flashpoint Ignite platform, we deliver unparalleled depth, breadth and speed of data from highly relevant sources, enriched by human insights. Our solutions span cyber threat intelligence, vulnerability intelligence, geopolitical risk, physical security, fraud and brand protection. The result: our customers safeguard critical assets, avoid financial loss, and protect lives.
