

Flashpoint National Security Intelligence

Tailored data, technology, and finished intelligence for mission-driven teams

Flashpoint National Security Intelligence (NSI) is a customizable solution that combines best-in-industry data collections with intelligence expertise, investigative tools, and AI capabilities to help government security and intelligence teams inform, operate, defend, and influence.

Key benefits

- ✓ Leverage the deepest and most varied data collection available
- ✓ Decrease training time with unrivaled ease of use
- ✓ Access finished intelligence from our analyst team
- ✓ Extend your team with integrated services
- ✓ Find information faster with real-time data
- ✓ Build your own custom toolkit guided by our team of veteran national security practitioners

Key features

DATA-AS-A-SERVICE

Delivers direct access to near-real-time information via REST API or Firehose so you can integrate Flashpoint data into your existing tooling.

GEOSPATIAL SOCIAL MEDIA INTELLIGENCE

Gathers geolocated data from dozens of open-sources ranging from social media to messaging apps and illicit communities, and enables users to search, monitor, analyze, and receive alerts from the data in real-time to identify threats to individuals, locations, or assets, and improve situational awareness anywhere in the world.

FLASHPOINT CYBER THREAT INTELLIGENCE

Helps you quickly find and take action against emerging and ongoing cyber threats. We combine our wide range of sources, across the deep and dark and surface web, along with our intelligence experts to give you visibility into your unique threat landscape.

VULNERABILITY INTELLIGENCE

Makes teams aware of the vulnerabilities that matter to their organization (not all of the vulnerabilities out in the wild, as it's not possible or necessary to monitor and remediate all vulnerabilities), this includes those with CVE IDs and those that aren't even covered by CVE/NVD, but could still have an impact on their organization.

MANAGED ATTRIBUTION

Offers a flexible, fully managed virtual environment that lets security teams focus on what matters most. Analysts can spend their time researching threats instead of building technology to do so.

PROFESSIONAL SERVICES AND MANAGED INTELLIGENCE

Bolster your team with intelligence services like requests for information, selector enrichment, staff augmentation, and tailored reporting services.

ABOUT FLASHPOINT

Trusted by governments, commercial enterprises, and educational institutions worldwide, Flashpoint helps organizations protect their most critical assets, infrastructure, and stakeholders from security risks such as cyber threats, ransomware, fraud, physical threats, and more. Leading security practitioners—including physical and corporate security, cyber threat intelligence (CTI), vulnerability management, and vendor risk management teams—rely on the Flashpoint Intelligence Platform, comprising open-source (OSINT) and closed intelligence, to proactively identify and mitigate risk and stay ahead of the evolving threat landscape.
