**FLASHPOINT**
NATIONAL SECURITY SOLUTIONS

Flashpoint for Defense

Technology, data, and intelligence, tailored for mission-driven teams

In the face of national security threats, defense organizations must stay prepared and make prompt, informed decisions to protect assets and potentially save lives. Leverage the data, technology, and services required to gain a holistic view of the online threat landscape and effectively defend against cyber and physical threats.

Flashpoint National Security Solutions (FNSS) supports defense intelligence, integrated cyberspace operations, and information operations, ensuring decision dominance and flexible response options for our clients in and through the integrated deterrence domain.

KEY USE CASES

- **Near-peer nation-state research:** Use open and closed sources to assess potential threats from nation-state adversaries.

- **Counterterrorism:** Access extensive social networks and illicit discussion channels to identify and monitor planning, recruitment tactics, and campaigns.

- **Crisis and event monitoring:** Improve situational awareness with geo-enriched global social media data. Identify potential threats within the chatter, and leverage intuitive analytical tools to assess their potential impact.

- **Geopolitical risk research:** Gather and analyze data from regional data sources to better understand geopolitical moves and motives.

- **Cyber network defense:** Prevent breaches and protect assets by gaining a holistic understanding of the tools, tactics, and procedures used by cyber threat actors.

- **Force protection:** Monitor PII for data leakage, doxing, and violent intent, and assess situations on the ground in global locations to protect key personnel.

FLASHPOINT TOOLKIT FOR DEFENSE

This comprehensive solution set delivers access to everything Flashpoint has to offer to support defense teams—from software, to services, and award-winning customer success.

Flashpoint Ignite delivers access to data from illicit communities, chat service platforms, the open web, and technical data, as well as finished intelligence reports in a single platform.

Echosec delivers geo-enriched data from a wide range of global open sources to streamline investigations, improve situational awareness, and monitor critical events in near-real-time.

Data-as-a-Service seamlessly integrates into your existing tooling to provide near real-time access to Flashpoint's robust data and intelligence.

Managed Attribution offers an isolated workspace to securely conduct digital operations.

Starter RFI package provides access to Flashpoint analysts to conduct research and save time.

Customer Success provides support from a team of former analysts with extensive industry-related experience.

Flashpoint Training Academy ensures your team realizes continual value from Flashpoint's solutions and is confident in their functionality.

Flashpoint provides the most comprehensive OSINT solutions today to support the different needs of the National Security market globally."
