

Flashpoint for The Intelligence Community

Technology, data, and intelligence, to drive information advantage

In response to the dynamic changes in the global information environment, the Intelligence Community must continually adapt to counter asymmetric national security threats. This involves acquiring timely, relevant, and effective information from both public and commercial sources (PAI and CAI) to generate open-source intelligence (OSINT)—which is now regarded as the ‘INT of first resort’ to address specific intelligence priorities, requirements, or gaps.

Flashpoint, with its robust data collection capabilities and industry-leading technology, enables the scalable and sustainable use of PAI and CAI for all intelligence missions. Flashpoint leverages a powerful combination of subject-matter-experts and automated data collection to deliver the most high-value, relevant data to its customers in a timely manner.

Flashpoint provides the most comprehensive OSINT solutions today to support the different needs of the National Security market globally.”

–BOB LENTZ, PRESIDENT, CYBER SECURITY STRATEGIES

KEY USE CASES

NEAR-PEER NATION STATE RESEARCH

Streamline the use of PAI and CAI to assess potential threats from nation-state adversaries.

TERRORISM INTELLIGENCE

Access extensive social media networks and illicit discussion channels to identify and monitor planning, recruitment tactics, and campaigns.

GEOPOLITICAL RISK RESEARCH

Gather and analyze data from regional data sources to better understand geopolitical moves and motives.

MISINFORMATION AND DISINFORMATION RESEARCH

Investigate and monitor campaigns and public sentiment to stay ahead of malign influence and potentially damaging social narratives.

FLASHPOINT TOOLKIT FOR INTELLIGENCE AGENCIES

Data-as-a-Service provides near-real-time access to Flashpoint's data and intelligence to ingest into your existing dashboards and tooling. Data is available via REST or Firehose (streaming) API.

Flashpoint Ignite delivers access to data from illicit communities, chat service platforms, the open web, and technical data, as well as finished intelligence reports in a single platform.

Echosec delivers geo-enriched data from a wide range of global open sources to streamline investigations, improve situational awareness, and monitor critical events in near-real-time.

Customer Success provides support from a team of former analysts with extensive industry-related experience.

ABOUT FLASHPOINT

Flashpoint is the pioneering leader in threat data and intelligence. We empower commercial enterprises and government agencies to decisively confront complex security challenges, reduce risk, and improve operational resilience amid fast-evolving threats. Through the Flashpoint Ignite platform, we deliver unparalleled depth, breadth and speed of data from highly relevant sources, enriched by human insights. Our solutions span cyber threat intelligence, vulnerability intelligence, geopolitical risk, physical security, fraud and brand protection. The result: our customers safeguard critical assets, avoid financial loss, and protect lives. Discover more at flashpoint.io.
