

Flashpoint For State, Local, & Tribal Government

In the face of domestic security threats, state, local, and tribal government organizations must stay prepared and make prompt, informed decisions to protect assets and potentially save lives.

Flashpoint combines extensive relevant data collection with expert intelligence and intuitive technology to help government teams identify online threats to mitigate risk.

State, local, and tribal government solutions include:

- Extensive data collections and technical intelligence
- Real-time, geospatial social media data, and intuitive analytical functionality
- Support from best-in-class intelligence experts
- Tailored training to ensure your team realizes continual value from Flashpoint

Key initiatives we support:

CRISIS MONITORING

- Improve situational awareness with real-time social data from anywhere in the world. Identify mentions of relevant keywords, groups, and topics, and analyze their potential impact.

CRIMINAL INTELLIGENCE

- Identify groups and individuals participating in illegal activities like trafficking, illicit commerce, violent crimes, and cyber attacks.

CRITICAL INFRASTRUCTURE PROTECTION

- Understand, manage, and mitigate risk to your cyber and physical infrastructure with intelligence generated from conversations in social channels and illicit communities.

FRAUD IDENTIFICATION

- Gather evidence of fraudulent activity from threat actors that are sharing unemployment and tax data through TTPS, user guides, and other indicators. Flashpoint's automated alerts and managed intelligence services help identify, stop, and prosecute this activity.

RANSOMWARE PREVENTION AND RESPONSE

- Learn how to avoid ransomware or cyber extortion attacks altogether, and in case of an attack, leverage our team to determine the extent, execute a response plan, and mitigate the impact.

This comprehensive solution set delivers access to everything Flashpoint has to offer to support government teams—from award-winning software, to services, and customer success.
